Professional Summary

Computer Science student pursuing Sales Engineering / Solutions Consulting roles, currently an AWS Student Builder Campus Leader and previously a Technical Sales Engineer Intern at Cisco. Proven presenter and seller as a founding team member of a live digital commerce startup, with a track record of translating technical and data-driven insights into clear customer value.

Education

California State University San Marcos Jan 2026 – May 2027 (Expected)
B.S. in Computer Science *San Marcos, CA*

Sierra College / Palomar College Aug 2023 – Dec 2025
Computer Science Coursework | Ranked Top 10% of Class *Rocklin, CA / San Marcos, CA*

Experience

Cisco Jun 2026 – Aug 2026
Technical Sales Engineering Intern *Remote*

- Shadowed and learned directly from senior Solutions Engineers, gaining insight into enterprise sales cycles.
- Contributed to a new sales enablement project for a Cisco product targeting the higher education vertical, researching, authoring, and structuring customer-facing reference documentation.
- Leading a capstone project to identify and develop an AI-driven solution, with findings to be presented to Cisco's Head of AI.

Amazon Web Services Aug 2026
AWS Student Builder Campus Leader *San Marcos, CA*

- Selected as an AWS Student Campus Leader at Cal State San Marcos, hosting cloud fundamentals workshops and driving student engagement with AWS services and certifications.

Flash Bang Authentics Sep 2025 – May 2026
Sports Break Host / Founding Team Member *San Marcos, CA*

- First employee at a live commerce startup that scaled to 10+ sellers and 500+ viewers per stream.
- Hosted live sales streams, exceeding quota by 2x through objection handling and upsell strategy.
- Led a team of 4 sellers, building stream scripts and offer structure to raise close consistency.

Granite Bay Golf Club May 2022 – May 2025
Guest Services / Member Relations *Granite Bay, CA*

- Delivered high-touch member support and event execution, building strong relationships through clear communication, attention to detail, and rapid problem resolution.

Projects

Sports Analytics & AI Prediction Systems | *Python, SQL, REST APIs, Data Pipelines* May 2025 – Aug 2025

- Built Python data pipelines to ingest, clean, and model large historical MLB datasets, integrating public REST APIs to transform raw inputs into structured features and predictive outputs.
- Automated end to end ETL workflows and scheduled report delivery, publishing recurring projections with clear metrics, assumptions, and limitations for non technical users.

Autonomous Internship Outreach Agent | *Make.com, REST APIs, Python, Gemini AI* Feb 2026

- Built a fully automated cold email outreach pipeline across 7 connected modules that extracts company domain and job title from a listing, retrieves verified contacts via the Hunter.io REST API, and generates personalized emails sent through Gmail, dispatching up to 15 tailored emails per request with no manual input.
